

Support Column for DISOMAT F and Printer

- Optimally suited for use with platform scales
- Easy mounting
- Extremely rugged design
- All metal parts stainless steel
- Integrated 24V power supply for use with both Disomat F and printer

Application

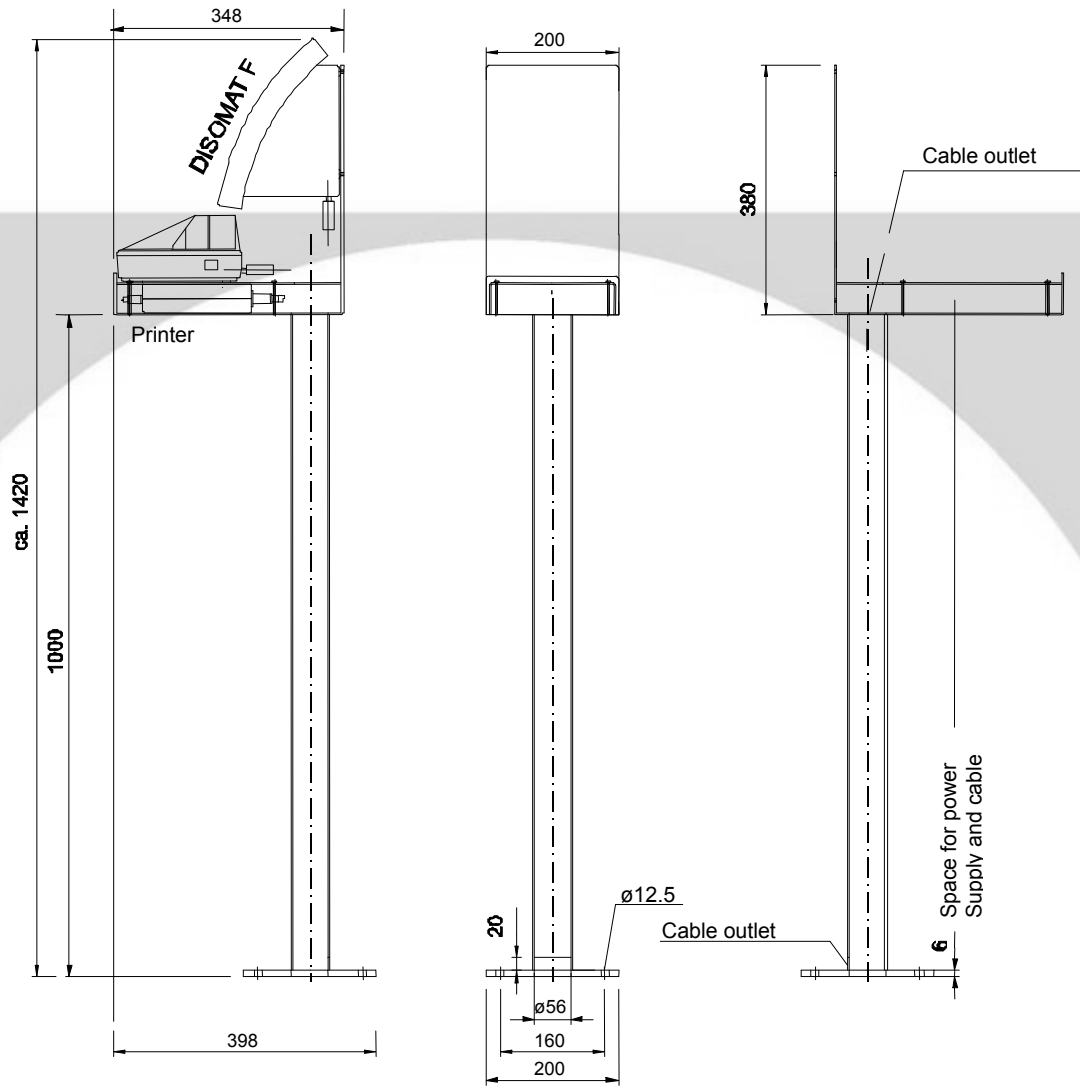

Designed as common carrier for one each Disomat F and Disoprint VPR 20150 printer, support column VSF 21300 ideally suits easy and ergonomical operation of platform scales.

Equipment

With all metal parts made of stainless steel, the column is suitable for use in severe environments, being affixed to the floor with the use of four bolts. Load cell and 230V power cables can either be laid underfloor or introduced into support column through cable inlet on the rear.

Functions

As DISOMAT F reads at 1300mm above floor level, the operator assumes a perfectly ergonomic position. Disomat and printer are powered by a finish wired 24V power supply.
